Developing the next generation of GMPs through the Sea Mariners program

PTC's Sea Mariners team recently visited campuses across the nation to meet with Sea Mariner scouts from various high schools and colleges.

On September 9, the Sea Mariners team went to Noveleta National High School (NNHS) for the first Ship Meet of NNHS Sea Mariner scouts who expressed their excitement to be part of PTC's youth program.

The team also went to Iloilo last September 1 to students from the Western Institute of Technology. On August 31, they met with cadets from St. Therese-MTC Colleges and John B. Lacson Foundation Maritime University who were given an orientation about the Sea Mariners program.

Sea Mariners is a youth development community and school activity designed to promote marine conservation awareness and an appreciation of our country's maritime heritage while instilling core values to Filipino youth.
