

SEPTEMBER 9, 2022

MARINA and PHILCAMSAT join forces for pilot run of Oil Tanker course

PHILCAMSAT conducted a Pilot Run of its Refresher Course on Advanced Training for Oil Tanker Cargo Operations. The four-day training was held on September 5 to 9, 2022.

The pilot course was made possible through the cooperation between the Research and Development Division of the MARINA-STCW Office and PHILCAMSAT's Research and Development and Training Operations. The course is part of the "full and complete effect compliance" in the implementation of the STCW.

Deck and engine officers who have not rendered sea service for at least 3 months in the last 5 years are required to take the course. It is also mandatory for officers onboard oil tankers who wish to apply as instructors.

PHILCAMSAT is given six months of probationary authority to offer the course.
