PTCi strengthens commitment to business continuity

Since achieving ISO 22301:2012 Certification in 2020, PTCi continues to strengthen its commitment to ensuring the proper implementation of the company's Business Continuity Management System (BCMS). To support this initiative, PTC personnel regularly undergo BCM training to update their knowledge and understanding of BCM and make them aware of their respective roles in ensuring that the company is always prepared to meet and address disruptions at any given moment.

Cognizant of this, the company's BCM team conducted a BCM awareness seminar for PTCi employees on May 26 at the Legaspi Room of First Maritime Place. The training is also in preparation for the company's 2nd External Surveillance Audit scheduled on September 2, 2022, which will focus on the new ISO 22301:2019 version of BCMS.
