

## *Sea Mariners conducts project management workshop for its Luzon and Iloilo ships*

Last November 26, the Sea Mariners team led by PTC and its implementing partner, ASSIST Asia, conducted two virtual sessions of its First Learning Activity. The workshop centered on Project Management and was designed to help capacitate the officers of Sea Mariners ships in initiating, planning, implementing, monitoring, and evaluating their respective youth-led activities.

The morning session was attended by officers of Luzon ships from SOS Children's Village and Tanza National High School (TNHS) ships. While the afternoon session was attended by the officers from Iloilo ships, from PHINMA University of Iloilo (UI), Western Technology Institute (WIT), and St. Therese College (STC). The sea mariners officers were able to brainstorm on projects anchored on the Sustainable Development Goals (SDG) of the United Nations. The officers of the ships who completed the 1st Learning Session will share their learnings from the Project Management workshop with their respective ship members.
